## ePresence Capture Station

## ePresence Capture Software<sup>new!</sup>

## ePresence Capture Web Module<sup>new!</sup>

### Use Cases

Description	Complete hardware-based solution designed for equipping a room with a dedicated ePresence Capture Station, or deployment on a media cart. Support for multiple media formats, high-definition h.264, and automated capture.	Optimized for mobile production of rich media presentations from a PC, Mac, or Linux laptop. Present PowerPoint™ and share your desktop with a webcam and mic. Or share the desktop of another presenter with an optional VGA2USB device.	A lightweight solution that gives presenters the ability to give a live talk via their web browser with just a webcam, mic, and PowerPoint™ presentation. No additional equipment or software installation required – just one-click webcasting and publishing.
Production scenarios	Room deployment, lecture theatres, mission-critical presentations and events.	Capture-on-the-go, multi-track conference sessions, travelling abroad.	Personal capture, tutorials, virtual talks with a remote presenter.
